Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14 and 27-28 drawn to compressing color or texture for generating compressed information, classified in class 382, subclass 166.

II. Claims 15-26 and 29-30 drawn to decompressing compressed information, classified in class 382, subclass 233.

3. Inventions I and II are distinct from each other because of the following reason:

Invention I and II are related as subcombination disclosed as usable together in single combination. The subcombinations are distinct from each other if they are shown to be separately usable. Invention I has separate utility such as compressing image for storing the image data and invention II has utility such as decompressing the stored information for image display.

4. Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their classification, restriction for examination purpose as indicated is proper.
